Manta, Ecuador | +593 989194770 | guerrerozamora213@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years building web products with Angular, TypeScript and Node.js. Experienced in transactional and iGaming platforms: integration of external casino and sportsbook providers and validation of financial workflows before certification and production release. On the frontend, I build reusable component systems and design tokens that speed up the development of new modules.

PROFESSIONAL EXPERIENCE

ZGames Technology July 2023 - Present

Full-Stack Developer | On-site

- Integrate external casino and sportsbook providers and participate in validating financial workflows before certification and production deployment.
- Develop interfaces for portals serving between 1,000 and 2,000 active users per client, along with backend services for managing users, reports, bets, and transactions.
- Reduced frontend module development time by 75% through reusable components and resources.
- Reduced inline styles by 90% by implementing design tokens.

Tecnored January 2024 - Present

Freelance Full-Stack Developer | Remote

- Implemented a Python ETL process to automatically synchronize inventory from Microsoft SQL Server to MySQL without disrupting the legacy system's operations.
- Develop and maintain the e-commerce platform and its admin panel using PHP and JavaScript.
- Created a bulk import module using the Google Sheets API to update products, prices, and promotions.

Empresa Pública Aguas de Manta May 2023 - June 2023

Web Development Intern | On-site

- Implemented authentication using OpenID Connect to manage user access.
- Integrated interactive maps with Mapbox to add geographic information to the application.

EDUCATION

Master's Degree in Web User Interface Design and Development 2026

Universidad Internacional de La Rioja | Spain, Remote

Bachelor's Degree in Information Technology Engineering 2024

Universidad Laica Eloy Alfaro de Manabí | Ecuador, On-site
